Re-Roofing Mitigation Package

	Contractor acknowledges that as required by Florida Building Code Sixth Edition (2017), Existing Building Section 707.3.2 the structure's Diaphragm will be evaluated and noted within Re-roof affidavit.
	Roof to wall connections: FBC-E Section 706.8
L.	Was the building permit for the home construction applied for on or after September 14, 1993? a. YES NO
2.	If the answer to question number 1 is YES, then proceed to signature and permit submittal. (Documentation required substantiating this application).
3.	$If the answer to question number \ 1 is NO, applicant must provide documentation for the \ value \ of the \ building \ (indicate \ type \ provided \ below):$
	a Copy of current home insurance summary sheet
	b Copy of latest tax bill or Property Appraiser office webpage for the home
	Note: the appraised value of the improvement determines the threshold amount.
١.	Based on documentation provided, is the value of the building \$300,000 or more?
	a. YES NO
;.	If the answer to question 4 is NO, proceed to signature and permit submittal.
5.	If the answer to question 4 is YES, then, will evaluation and connections at prioritized and non-prioritized areas be completed for 15% of the cost of roof replacement? YESNO
	(Hurricane Retro-fit affidavit will be required per FBC-E section 706.8 prior to Certificate of Completion and retro-fit contractor shall be noted on permit)
7.	If the answer to question 6 is NO, provide documentation of the cost of evaluation/installation and indicate "prioritized" areas in which will be enhanced up to 15% of roof replacement, See 8(a) for additional requirements. NOTICE: This documentation will be reviewed for appropriateness, since prescriptive methods of mitigating roof to wall connections provide necessary designs to accomplish roof to wall connections improvements. Misrepresentation of information above may be construed as a willful codeviolation. An additional 15% of the cost of the re-roofing must be spent on enhanced connections, but the mitigation is not required to exceed that. The roof to wall connections must be enhanced to comply with FBC-E section 706.8. The priorities for upgrading are outlined in section 706.8.1.7. At least 15% shall be provided to the prioritized elements.
	a. These items are required to be submitted:
	 i. Permit description to include notation that Mitigation Retro-fit will be installed (Retro-fit work to be conducted by a residential, building or general contractor)
	ii. Sub affirmation form for contractor whom will install retro-fit components
	iii. A plan indicating areas to be retro-fitted, connectors used, and fastener requirements. iv. Any applicable documentation specified above. Signature/of Qualifler/Owner Builder/ Authorized Agent Authorized Agent Authorized Agent
