**Subject: Vegetation Removal Permit**

Dear Sir or Madam,

Please find the enclosed application for a vegetation removal permit for a parcel owned by the South Florida Water Management District (SFWMD). The parcel is proposed to serve as the SFWMD's Big Cypress Field Station, which will be developed under a future SDP.

In order to begin site design in preparation for the SDP application, geotechnical borings are required within the site. In order to access the locations where geotechnical borings are necessary, clearing of the existing vegetation will be required. Enclosed with this application is a map showing the parcel location as well as the proposed boring locations. In total there are 15 borings proposed which will require the removal of approximately 0.37 Acres +/- of vegetation. Also enclosed is a vegetation FLUCCS map showing that the current land cover is a mix of Brazilian Pepper and mixed shrubbery. It is believed that the project area is entirely upland vegetation; however a wetland determination has not been performed for the site.

Please review and contact us if you should have any questions.

Very truly yours,
