Narrative statement: Provide a brief and concise narrative statement and schematic drawing of sewage treatment process to be used as well as a specific statement regarding the method of affluent and sludge disposal. If percolation ponds are to be used, then percolation data and soil involved shall be provided from tests prepared and certified by a professional engineer.

Collier County Utility Dedication Statement: If the project is located within the service boundaries of Collier County's utility service system, a notarized statement shall be provided agreeing to dedicate the water distribution and sewage collection facilities within the project area to the Collier County Utilities. This shall occur upon completion of the construction of these facilities in accordance with all applicable County ordinances in effect at that time. This statement shall also include an agreement that the applicable system development charges and connection fees will be paid to the County Utilities Division prior to the issuance of building permits by the County. If applicable, the statement shall contain an agreement to dedicate the appropriate utility easements for serving the water and sewer systems.

Statement of Availability Capacity from other Providers: Unless waived or otherwise provided for at the pre-application meeting, if the project is to receive sewer or potable water services from any provider other than the County, a statement from that provider indicating adequate capacity to serve the project shall be provided.

Water, Wastewater and IQ Availability

Dear Ms. Janes:

Water service is available for this project from a 10" water main running along Manatee Road. Wastewater service is available from 10" force main running along Manatee Road. Irrigation Quality (IQ) water is not available to the project at this time.

Connection points for the system tie-ins to water and wastewater lines may be made after submission and approval of the hydraulic calculations by the Planning and Project Management Department, validating that the up/downstream systems are adequate to handle the increase in demand or flow.

This letter implies no guarantee that other developments throughout the District will not have an impact on the quantity of water and wastewater treatment and disposal capacity available to this property until the project has received a commitment for service.

Should you have any further questions, please feel free to contact me at (239) 252-5366.

Sincerely,

Kris Van Lengen, Principal Planner
Planning and Project Management Department
